# Documentation

1. Design:
   - Main:

   - Login:

- Products:

- About us:

- News:

- Contact:

2. Directory Schema:
   - For the directory structure, I decided to divide it into three main folders:
     o Php: para los archivos .php
       ▪ Aquí hay 6 archivos, los cuales son:
         • **Main.php:** The homepage of the website
         • **Login.php:** The login page.
         • **Products.php:** The products page.
         • **News.php:** The news page.
         • **AboutUs.php:** A page with information about the company.
         • **Contact.php:** The contact form page. This page can only be accessed if the user is logged in.

All pages can be accessed from the navigation bar at the top of each screen (except for the login page). The "Contact" page requires the user to be logged in, while other pages are accessible without logging in.

To log in, the user can either click on the "Contact" link in the navigation bar (if not logged in) or click the login icon next to the shopping cart on the right side of the navigation bar.
     o **Img Folder:** This folder contains all the images displayed on the website.
       CSS Folder: This folder contains the `.css` stylesheets used for styling the `.php` pages.
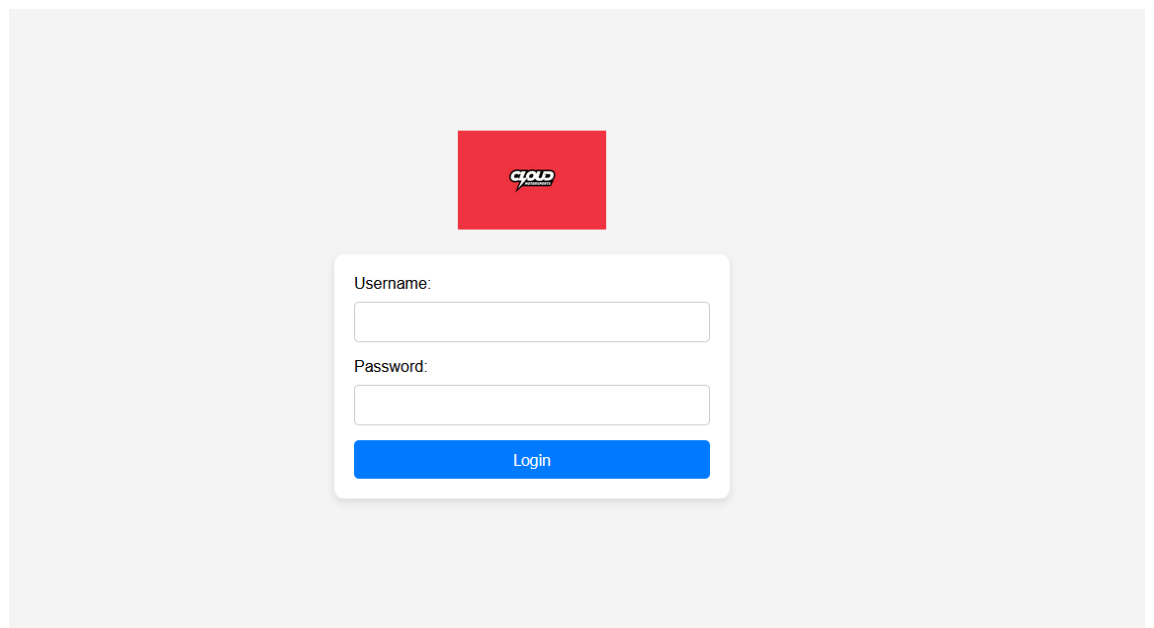

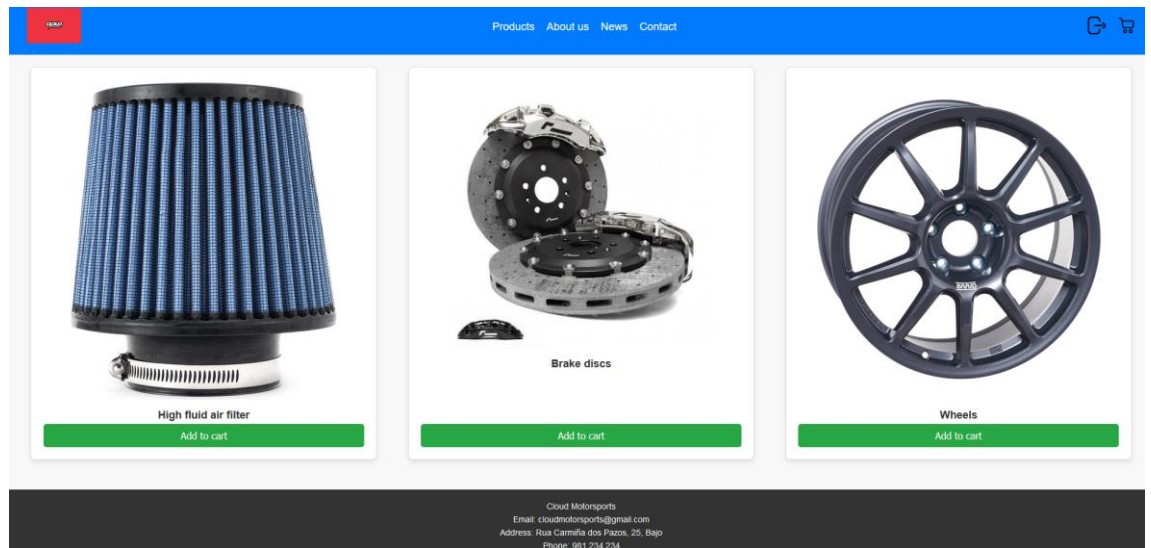

- css
  - aboutUs.css
 - contact.css
  - login.css
  - main.css
  - news.css
  - products.css
